

Encoding Complex Wettability Patterns in Chemically Functionalized 3D Photonic Crystals

Ian B. Burgess,* Lidiya Mishchenko, Benjamin D. Hatton, Mathias Kolle, Marko Lončar, and Joanna Aizenberg*

2011, 133, 12430–12432. DOI: 10.1021/ja2053013

Page 12431: The caption for Figure 2A was mislabeled. The entire caption should read as follows:

(A) Optical images of an IOF in which the word “W-INK” is encoded via the surface chemistry in an IOF: “W-” TMS, “I” 13FS, “N” DEC, “K” 3FS, background ROH. In different water–ethanol mixtures, different words appear. (B) Optical images of a film encoded with three bars (from left) 13FS, DEC, 3FS, displaying distinct optical patterns when immersed in the common solvents, water, acetone, and isopropanol.
